

**Year 6
Curriculum
Term 6**

PSHE

In PSHE this term, we will be completing our Sexual Education lessons. Please see the letter sent out by Mr Parkin for more information about this.

Maths

This term will primarily focus on consolidating the KS2 curriculum ahead of secondary school. We will complete daily arithmetic as well as completing challenges that apply mathematics to the real world. The children will look at recipes, budgeting and bus timetables!

English

The children will write two narratives this term. The first will be dark and spooky and based on 'A Monster Calls'. The second will explore the impact of deforestation!

Later in the term, we will use our writing skills to reflect on Year 6.

We will also link our learning to our production! Persuasive adverts or reviews anyone?

Science

This term we will continue learning about adaptation and variation. We will learn about Charles Darwin's theories and look at Darwin's Finches (not to be confused with Darwin's Dragons!). We will also look at fossilisation.

D & T

This term will rely on utilising our computing and coding skills. We will be programming our own compasses!

Art

We will be looking at landscapes.

Geography

We will develop our learning on renewable energy. We will use this to plan and complete our own fieldwork study. The children practised map reading last term and this will be developed and linked to transition activities.

Production

Did we mention it is the Year 6 production?!

PE / Forest School

This term the children will have their Forest School lessons, delivered by Mr Kitch.

In PE, we will continue preparing for our Sports Morning with various athletic activities.

We will also be learning class dances for the production.
